PTB Series Fertiliser Spreader

The COSMO PTB Series Fertiliser Spreaders is a wide wheel based tow-type spreader with a squat hopper that makes loading easy.

It has been designed to spread pilled, granular or powdered fertiliser and seed, accurately from 8 to 16m, without the PTO connection of a tractor. A 50mm tow hitch enables the spreader to be connected to a range of machines (ATV, RTV, tractor and/or car).

The spinner disc is powered by the large floatation tyres while the gearbox has been designed so the operator can disconnect the disc (stop it spinning) when they are in transit and not spreading. The PTB Spreader has been developed with twin exits that allow the operator to customise the spread pattern (left, right or full coverage).

The PTB Spreader hopper and frame is manufactured and painted in the COSMO factory, in Italy.

Refer to page 67 for details of COSMO's state of the art, automated painting system.

Code	CPTB-560
Size reference	560ltr Tow Type Spinner Spreader
Capacity (lt/kg)	485 / 480
Spreading width (m)	8 - 16
Dimensions	
Width (mm)	1900
Depth (mm)	2100
Height (mm)	1400
Weight (kg)	140

Options

902.005 Hopper cover (PTB560)
